

Harvard Initiative on Reducing Global Methane Emissions

Supported by the Salata Institute for Climate and Sustainability at Harvard University

The Harvard Initiative on Reducing Global Methane Emissions is one of five Climate Research Clusters funded by the Salata Institute for Climate and Sustainability at Harvard University. The Methane Initiative includes a set of projects directed by members of the Harvard Faculty that explore topics related to reducing methane emissions and conduct outreach to stakeholders, based on this research.

The home page for the methane initiative's website is:

<https://salatainstitute.harvard.edu/projects/methane/>

Publications and news appear at the bottom of this page.

A detailed description of the methane initiative is here:
